Luxury glass bathroom accessories set round shape with swirl stripe ion plate soap dispenser

Product introduction:

This is a five-piece electroplated glass bathroom accessory set, featuring a modern and textured design that serves as an exquisite visual focal point to elevate any bathroom space.

The entire set is dominated by an electroplated finish, with surfaces meticulously polished to a mirror-like sheen and metallic luster. The main bodies of the bottles and containers are crafted from glass, featuring a distinctive twisted spiral pattern that creates a rhythmic play of light and shadow under illumination. This not only enhances the three-dimensional sense but also avoids monotony.

From left to right, the five pieces each serve their own purpose:

Toilet brush holder: A cylindrical base paired with a matching metal brush handle, boasting clean and crisp lines. The electroplated surface harmonizes with the glass texture, combining practicality and decorative appeal.

Cotton jar: Designed with a lid, the spherical knob on top complements the twisted details of the jar body. It provides easy access to small items like cotton pads and swabs while keeping the bathroom countertop tidy.

Lotion dispenser: Equipped with a press-type pump head, ideal for hand soap or body wash. The sleek twisted bottle body creates a material contrast with the ABS pump head, offering a smooth pressing feel and even liquid dispensing.

Toothbrush holder: Featuring a dual-compartment design, it can hold two toothbrushes simultaneously, allowing clear visibility of the contents while keeping the countertop uncluttered.

Tumbler: A standalone single cup, suitable for rinsing or storing small items. It maintains the same twisted texture as the toothbrush holder, ensuring visual consistency across the set.

Overall, this five-piece bathroom accessory set achieves a perfect balance between functionality and aesthetics through the craftsmanship of combining glass and electroplating, along with the consistent twisted design. It is suitable for modern minimalist bathrooms and can also infuse a touch of luxury into traditional spaces, making it an ideal choice to enhance the elegance of any bathroom.

Cleaning Tips for the 5-Piece Glass Bathroom Set

This electroplated glass bathroom accessory set can stay shiny and new with simple daily care.

I. Daily Cleaning (1–2 times a week)

Wipe the surface dust and water stains with **clean water + a soft cloth**. Avoid using scouring pads or steel wool to prevent scratching the electroplated layer.

For the twisted glass patterns, gently brush the crevices with a soft brush or cotton swab to prevent dust buildup.

Clean the inside of the lotion bottle promptly after use to prevent residue from becoming sticky and clogging the pump.

II. Removing Water Stains and Limescale

Use a mild dish soap or glass cleaner, spray it on, let it sit for 1 minute, then wipe off.

Dry thoroughly—air-dried water stains will leave white marks and dull the shine.

III. Electroplated Parts Care (Key Points)

Avoid contact with strong acids, alkalis, disinfectants, or bleach.

Do not leave the items damp for long periods; dry them after use to prevent oxidation and blackening.

IV. Tips for Each Component

Lotion dispenser: Regularly clean the bottle and pump head, and let them dry before refilling.

Tumbler / Toothbrush holder: Rinse the inside daily to avoid toothpaste residue.

Cotton jar: Keep it dry to prevent cotton pads from getting damp and moldy.

Toilet brush: Rinse thoroughly with clean water after use and let it drain; disinfect the base regularly.

V. Prohibitions (Must Avoid)

Do not use strong acids, alkalis, or bleach

Do not use hard brushes or abrasive sponges

Do not leave cleaners on the electroplated surface for too long

Do not expose to direct sunlight or allow water to accumulate for long periods

With simple care, this bathroom set will maintain its delicate, translucent appearance and grow more elegant with use.
