## Cleaning Tips for the 5-Piece Glass Bathroom Set

This wine red ribbed resin bathroom six-piece set combines vintage texture with practical functions. Proper daily cleaning and maintenance can help it retain its bright color and delicate texture for a long time. Below is a component-by-component cleaning guide:

### I. General Cleaning Principles

**Material Characteristics:** The main body is made of resin, which is moisture-resistant and stain-resistant. However, it is necessary to avoid contact with highly corrosive cleaners (such as strong acids, strong alkalis, and chlorine-containing bleach) to prevent surface fading or loss of luster.

**Daily Cleaning:** It is recommended to rinse with clean water every day and perform a deep cleaning once a week to prevent the accumulation of soap scum, water stains and bacteria.

**Cleaning Tools:** Prioritize the use of soft cloths, sponges or soft-bristled brushes. Avoid hard tools such as steel wool and scouring pads to prevent scratching the ribbed texture.

### II. Component-Specific Cleaning Methods

#### Soap Dispenser

Daily: Before refilling with liquid each time, rinse the bottle with warm water, dry it, and then fill it with new hand soap or body wash to avoid spoilage caused by mixing old and new liquids.

Deep Cleaning: Unscrew the ABS pump head, soak it in warm water + neutral detergent for 10 minutes, use a soft brush to clean the residual soap scum inside the pump head, rinse it thoroughly, and let it dry before reinstalling.

#### Tumbler

Rinse with clean water after daily use and dry the water inside the cup to prevent water stains.

For stubborn stains, dip a soft cloth in a small amount of baking soda paste and wipe gently, then rinse with clean water.

**Toothbrush Holder**

Rinse with clean water every day and timely clean the residual toothpaste foam.

The partition is prone to dirt accumulation; you can dip a soft-bristled toothbrush in neutral detergent to brush gently, then rinse with clean water and let it dry.

**Soap Dish**

Pour out the accumulated water every day and rinse the dish surface and lid with clean water to avoid soap scum formed by residual soap liquid.

The radial texture is prone to dirt accumulation; you can dip a soft-bristled toothbrush in neutral detergent to brush gently, then rinse with clean water and let it dry.

**Cotton Jar**

Empty the internal items regularly, clean the jar body and lid with warm water + neutral detergent, and let them dry completely before storing cotton pads, cotton swabs and other items to prevent moisture and mold.

Avoid wiping with organic solvents such as alcohol to prevent damage to the resin surface.

**Toilet Brush**

After each use, rinse the brush handle and brush head with clean water, then put it into the brush holder to drain water.

Soak the brush head in diluted neutral disinfectant for 5-10 minutes every week to kill bacteria, then rinse and let it dry.

The inside of the brush holder is prone to water accumulation; it needs to be cleaned regularly with a soft brush to keep it dry and clean.

**III. Maintenance Tips**

Avoid prolonged direct sunlight to prevent aging and fading of the resin material.

Place it away from sharp objects to prevent scratching the ribbed texture.

If stubborn stains are accidentally stained, first soften the stains with warm water, then wipe with neutral detergent, do not scrub too hard.

By following the above cleaning and maintenance methods, this bathroom six-piece set can always maintain a bright and beautiful appearance, creating a retro and elegant atmosphere for your bathroom.
