## New design ombre blue glass bathroom accessories set round with diamond dot soap dispenser tumbler soap dish

### Product introduction:

When your fingertips touch this gradient blue bathroom set, it feels like holding a handful of flowing starlight from the deep sea. Crafted from transparent glass, it naturally unfolds a seamless gradient from misty light blue to deep cobalt blue, paired with a three-dimensional diamond texture that refracts delicate glimmers under the light, turning daily grooming into a soothing visual delight.

This complete 4-piece set includes a soap dispenser, tumbler, toothbrush holder, and soap dish, offering full functionality with a cohesive aesthetic. The soap dispenser features a sand nickel-colored ABS pump head with a fine matte finish—warm to the touch, fingerprint-resistant, and designed for smooth, even dispensing. It avoids the risk of metal oxidation while creating a gentle contrast with the cool tone of the glass. The toothbrush holder comes with a matching sand nickel metal rack, featuring a cross-divided design to securely hold multiple toothbrushes, ensuring ventilation and hygiene. The tumbler and soap dish echo the same diamond texture and gradient hue: the tumbler has a rounded, comfortable grip, and the dish features a slightly concave surface to effectively contain soap residue, showcasing meticulous attention to detail.

The glass material is transparent and easy to clean, with water and moisture resistance that perfectly suits the humid bathroom environment—simply wipe it down to restore its clarity. The soft gradient blue tone is understated yet elegant, seamlessly blending with various bathroom styles from Nordic minimalism to modern luxury, while infusing cool-toned spaces with a tranquil oceanic ambiance, elevating the bathroom from a functional area to a personal sanctuary for relaxation.

From the first sip of water in the morning to the evening cleansing ritual, this bathroom set redefines the ritual of ordinary life through its exceptional texture and aesthetic. It is more than just a set of grooming tools—it is a celebration of life's beauty hidden in the details, making every encounter with water a moment of gentle poetry.

### **Cleaning Tips for the 4-Piece Glass Bathroom Set**

Cleaning & Care Guide for Gradient Blue Glass Bathroom 4-Piece Set

#### I. Daily Basic Cleaning (Once daily or every 2 days, to prevent buildup)

After daily use, the bathroom set is prone to water spots and soap residue. Timely cleaning prevents limescale and stains, preserving the glass's transparent sheen.

**General Steps:** Use a soft cotton cloth, sponge, or microfiber cloth dampened with warm water to gently wipe the surface of the set, removing dust, water spots, and soap residue. Dry thoroughly with a clean cloth afterward to avoid watermarks that cause limescale.

**Precautions:** Do not use rough cloths, steel wool, or scouring pads, as they may scratch the gradient coating and diamond texture of the glass, or damage the matte finish of the sand nickel-colored components.

---

#### II. Targeted Cleaning by Component (Once weekly, for deep removal of stubborn stains)

##### 1. Soap Dispenser (with Sand Nickel ABS Pump)

**Bottle Cleaning:** Add a small amount of neutral detergent (e.g., dish soap, mild hand soap) to warm water, stir well, and use a sponge to wipe the bottle, focusing on hard-to-reach areas like the bottom and neck. Rinse thoroughly with clean water and dry with a cloth.

**Pump Cleaning:** Over time, the pump may clog or retain soap. Unscrew the pump and rinse the internal channels with warm water. For severe clogs, soak the pump in warm water for 5–10 minutes, gently brush the small holes with a soft brush, and air-dry before reinstalling. Avoid acidic cleaners on the sand nickel pump to prevent oxidation and discoloration.

## 2. Tumbler

The tumbler easily accumulates toothpaste stains and water spots. Pour a small amount of warm water into the cup, add 1–2 drops of neutral detergent, and gently scrub the inner and outer walls and bottom with a soft brush, paying extra attention to toothpaste residue around the rim. Rinse thoroughly and invert to air-dry to prevent bacterial growth from trapped water.

## 3. Toothbrush Holder (with Sand Nickel Metal Rack)

**Metal Rack Cleaning:** Dampen a dry cloth with a small amount of neutral detergent and gently wipe the rack to remove dust and water spots. Avoid chlorine or acid-based cleaners (e.g., toilet cleaner, white vinegar) to prevent oxidation, fading, or loss of the matte finish.

**Holder Body Cleaning:** Clean the glass portion using the same method as the tumbler. Use a soft brush to clear hair and dust from the cross-divided gaps to ensure ventilation and reduce bacteria.

## 4. Soap Dish

The soap dish traps soap residue and scum easily. Wipe the surface with a sponge dampened in warm soapy water, focusing on the concave area. Rinse thoroughly, dry completely, and place in a dry spot to prevent fogging from prolonged soap buildup.

---

## III. Removing Stubborn Stains & Limescale

For limescale or tough stains on the glass, use these gentle methods to avoid damaging the gradient coating:

**Limescale Removal:** Dampen a soft cloth with a diluted citric acid solution (1 part citric acid to 10 parts warm water), gently wipe the affected area, let it sit for 3–5 minutes, then rinse and dry. Alternatively, use a neutral, non-corrosive glass limescale cleaner following the product instructions.

**Stubborn Stains (e.g., dried soap, toothpaste):** Soak the stained area in warm soapy water for 5 minutes, then gently scrub with a soft brush. Do not scrape vigorously to avoid scratching the glass texture.

---

## IV. Prohibitions & Care Notes

**Avoid corrosive cleaners:** Do not use toilet cleaner, bleach, chlorine disinfectants, or strong acids/alkalis, as they will corrode the glass gradient coating and sand nickel components, causing discoloration, peeling, or loss of shine.

**Avoid prolonged soaking:** Do not submerge the set in water for long periods, especially the sand nickel hardware and ABS pump, as this accelerates oxidation and damage.

**Dry thoroughly after cleaning:** Always dry the set completely and place it in a dry, well-ventilated area of the bathroom to prevent limescale buildup and bacterial growth.

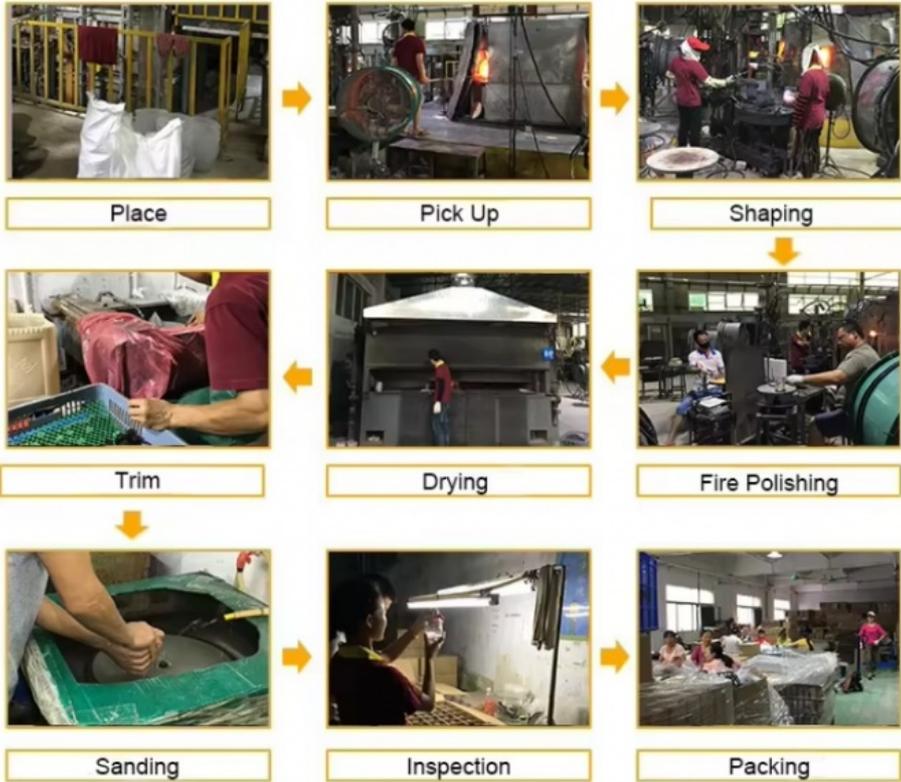

**Prevent impact:** Glass is fragile, and sand nickel components scratch or chip easily. Avoid dropping or knocking the set.

**Regular inspection:** Check the sand nickel pump and rack periodically. If loosening or oxidation occurs, clean and dry promptly. Apply a small amount of neutral maintenance oil (e.g., sewing machine oil) if needed to extend service life.

Following these cleaning and care steps will keep your gradient blue glass bathroom set looking clear, glossy, and pristine, turning every daily grooming routine into a moment of refined comfort.

## Production process

## PROCESS FLOW

## FAQ

### Are you a factory or trading company?

We are a factory with sales office and factory in Dongguan, China. Our factory has BSCI certificates and more than 60 experienced workers.

### How about the delivery day?

We need 60 days as production lead time after the order is confirmed. We have no stock at hand, so we will prepare material and arrange mass production according to your purchase order.

### Can I use my own design/color?

Surely you can! You can change the color of the include parts & body, components, and pattern. We can follow your design and artwork in mass production. For some new design, tooling might be needed; we will advise on the tooling cost and lead time before creating.

### How about the MOQ?

Basically we need MOQ 800 pcs per style/color. We have no stock at hand, so we can only prepare the material and arrange mass production according to your purchase order. However, we are quite flexible on this matter. Please contact our sales team about your plan. We will try our best.
