### Product Description

#### New design stripe smoke glass bathroom accessories set round hand soap dispenser tumbler toothbrush holder

#### Product introduction:

This smoked glass 6-piece bathroom set is a perfect blend of high-end design and practical functionality, infusing your bathroom with luxury aesthetics and elevating the overall style of your bathroom space.

Crafted from high-transparency smoked glass, the entire set features a hazy retro texture with three-dimensional twisted textures. As light flows through, it exudes exquisite layers, seamlessly complementing modern minimalist, luxury retro, and French bathroom styles.

The 6-piece set meets all your bathroom needs:

**Soap Dispenser:** Features a twisted glass body paired with an antique bronze ABS pump. The pump presses smoothly without sticking, ideal for dispensing hand soap or shower gel. The combination of antique metal and smoked glass creates a retro luxurious feel, balancing aesthetics and practicality perfectly.

Our Product Introduction

**Dual-compartment Toothbrush Holder:** Equipped with an antique bronze metal inner frame that divides the space into two compartments, allowing classified placement of toothbrushes and electric toothbrush heads. The twisted glass cover provides dust and moisture protection, keeping your vanity tidy and organized.

**Rinse Cup:** Made of the same series of smoked glass with twisted textures, the cup has a round shape that fits comfortably in the hand. Suitable for daily gargling and brushing, it boasts a smooth texture and is easy to clean without water stains.

**Soap Dish:** Designed with twisted edges, it effectively drains water to keep soap dry while preventing slipping. Its compact and exquisite design saves minimal countertop space.

**Storage Tray:** A rectangular flat tray that can unify the entire bathroom set or hold skincare products, aromatherapy, and other small items, eliminating countertop clutter for a neat look.

**Lidded Cotton Jar:** Features a sealed glass lid for dust and moisture protection, perfect for storing bathroom essentials like cotton pads, swabs, and bath salts. The twisted glass body matches the entire set, offering both storage and decorative value.

Made of safe and eco-friendly glass, the set is odor-free and easy to clean. The antique bronze hardware is corrosion-resistant and non-rusting, ensuring durability. Whether for personal use to enhance your quality of life or as a thoughtful gift for friends and family, this set is a premium choice that combines beauty and practicality, turning every daily wash into a delightful experience.

**Cleaning Tips for the 6-Piece Glass Bathroom Set**

To preserve the luxurious texture, crystal-clear luster, and extend the service life of this smoked glass 6-piece bathroom set, please strictly follow the scientific cleaning and maintenance specifications below:

1. Daily Basic Cleaning (Daily/Weekly Routine)

**Regular Wiping:** After daily use, wipe off water stains on the surface of the set with a soft, slightly damp cotton cloth or non-woven fabric to prevent residual water from forming stubborn limescale. Polish the glass surface with a dry soft cloth weekly to restore its transparent shine.

**Stain Removal:** For light fingerprints and dust, dampen a soft cloth with warm water and a small amount of neutral dish soap, wipe gently, then dry immediately with a clean cloth to avoid water marks.

**Important Notes:** Do not use rough cloths, steel wool, or scouring pads (with abrasive particles), as they may scratch the twisted glass texture and antique bronze hardware surfaces.

2. Stubborn Stain Cleaning (Special Treatment for Limescale/Soap Scum)

**Limescale Removal:** For stubborn water stains and limescale on glass, dilute white vinegar (or citric acid solution) in a 1:10 ratio, spray evenly on the stained area, let it sit for 3-5 minutes, wipe gently with a soft cloth, rinse thoroughly with clean water, and dry completely.

**Soap Scum Removal:** For soap residue on the soap dispenser and soap dish, soak in warm water for 10 minutes first, then gently wipe with a soft sponge dipped in a small amount of baking soda (or professional glass cleaner), paying special attention to the gaps in the twisted texture. Rinse with clean water and dry after cleaning.

3. Component-Specific Care

1. Soap Dispenser (with Antique Bronze ABS Pump)

Regularly drip a small amount of clean water into the pump and press it several times to clean the internal channel, preventing hand soap residue from clogging. Remove the pump monthly (twist counterclockwise to take off), rinse with warm water, and reinstall to ensure smooth pressing.

Do not soak the soap dispenser in water for a long time, to prevent water from seeping into the pump and causing jamming or rust.

## 2. Glass Components (Rinse Cup, Cotton Jar, Soap Dish, Tray)

The glass has limited heat resistance. Do not pour boiling water directly into it, to avoid cracking due to thermal expansion and contraction. Keep the cleaning water temperature between 0-60°C.

When cleaning the sealed lid of the lidded cotton jar, gently remove the glass lid, wash it separately with warm water, dry it, and reinstall it to ensure a tight fit between the lid and the jar mouth, preventing moisture.

## 3. Antique Bronze Metal Components (Toothbrush Holder Frame, Pump)

Metal surfaces are susceptible to moisture. Wipe off all water thoroughly after cleaning. Apply an extremely thin layer of professional metal maintenance oil (or hand cream) monthly to insulate from air and delay oxidation and rust.

For slight oxidation spots on metal, wipe gently with a soft cloth dipped in a small amount of toothpaste, rinse with clean water, and dry. Stop using if severe oxidation occurs to avoid contaminating the bathroom environment.

## 4. Storage Guidelines

When not in use for a long time, dry all components completely, wrap glass parts with soft paper/cloth (to prevent the twisted textures from bumping each other), and store in a dry, well-ventilated storage box.

Avoid placing the set in direct sunlight, to prevent the smoked glass from fading and metal components from accelerating oxidation due to long-term exposure.

## 5. Core Prohibitions

Do not use hard cleaning tools such as steel wool, abrasive cloths, or hard bristle brushes

Do not use strong acid/alkali or chlorine-containing bleach cleaners

Do not subject to high-temperature boiling, sun exposure, or sudden temperature changes

Avoid heavy impact on glass components (glass is fragile)

Do not expose metal components to standing water or humid environments for a long time

Following this cleaning and care guide will help maintain the transparent texture and exquisite appearance of the bathroom set for a long time, continuously adding a luxurious atmosphere to your bathroom.

## Production process

## FAQ

**Are you a factory or trading company?**

We are a factory with sales office and factory in Dongguan, China. Our factory has BSCI certificates and more than 60 experienced workers.

**How about the delivery day?**

We need 60 days as production lead time after the order is confirmed. We have no stock at hand, so we will prepare material and arrange mass production according to your purchase order.

**Can I use my own design/color?**

Surely you can! You can change the color of the include parts & body, components, and pattern. We can follow your design and artwork in mass production. For some new design, tooling might be needed; we will advise on the tooling cost and lead time before creating.

**How about the MOQ?**

Basically we need MOQ 800 pcs per style/color. We have no stock at hand, so we can only prepare the material and arrange mass production according to your purchase order. However, we are quite flexible on this matter. Please contact our sales team about your plan. We will try our best.
